

Circulators up to 40 GHz

TECHNICAL SPECIFICATIONS

- Frequency range up to 40 GHz – complete coverage for S-, C-, X- and Ku-band applications
- Low insertion loss and high port-to-port isolation for maximum signal integrity
- Standard coaxial, dual junction, and drop-in packages for flexible system integration
- SMT variants up to 15 GHz for compact PCB layouts
- Thermally optimized designs for continuous and pulsed high-power applications

APPLICATIONS

Telecommunications systems
and 5G/6G infrastructure

Radar applications (FMCW,
pulsed, CW)

SATCOM and defense systems

Test and measurement
instruments with strict isolation
requirements

HPA and LNA protection circuits
