

Limiter up to 40 GHz

TECHNICAL SPECIFICATIONS

- Frequency range up to 40 GHz for broadband RF applications
- Fast limiting characteristics with precise threshold setting
- Minimal insertion loss during unlimited operation
- Various output power levels for flexible system integration
- Coaxial connector types (SMA, N, Type-N) depending on requirements

APPLICATIONS

5G/6G communication systems and wireless networks

Radar and FMCW sensor systems

RF test equipment and measurement chains

High-power amplifier protection circuits (HPA inputs)

Defense and Mil-Spec applications

Satellite communication (SATCOM)
