

# Coaxial Components up to 110 GHz \u2013 AT Microwave

## APPLICATIONS

5G & 6G Telecommunications: Wideband, low-noise signal reception for next-generation infrastructure

SATCOM & Aerospace: High-reliability RF frontends for satellite communication systems

Defense: Precision frequency generation and signal conditioning for radar and EW systems

Research & Test: Reconfigurable test and measurement solutions for laboratories

Optical Communications: High-frequency modulator drivers to 100 GHz
