

RF Switches up to 67 GHz

TECHNICAL SPECIFICATIONS

- Frequency range from DC to 67 GHz – ideal coverage for RF, microwave, and early mmWave applications
- Mechanical and PIN diode technology – SPST to SP18T configurations for manual and automated control
- High switching speed and low VSWR – reliable signal routing without reflection losses
- USB and remote control options – integration into automated test and measurement systems
- Coaxial connectors – standard interfaces for simple system integration

APPLICATIONS

Telecommunications and 5G/6G networks

SATCOM and defense systems

Radar, FMCW, and ADAS measurement systems

RF test and measurement

Laboratory equipment and signal distribution
