

Industrial 4-Port USB Hub LPH-204B

TECHNICAL SPECIFICATIONS

- **Port Configuration**
4 independent USB ports with simultaneous full-power operation capability
- **Noise Performance**
Ultra-low noise design optimized for sensitive audio and video signal capture
- **Housing**
Robust cast-aluminum construction for mechanical durability in field and lab conditions
- **Power Supply**
High-capacity power delivery with sufficient current capacity for all ports under maximum load
- **Monitoring**
Integrated DVM probe port for real-time USB device current consumption monitoring on Port 1
- **Accessories**
Universal AC/DC wall adapter and USB host cable included

APPLICATIONS

RF & Microwave Measurement:
Multiple connected instruments
in test and measurement
systems

Signal Generation & Analysis:
Laboratory platforms requiring
reliable multi-peripheral
connectivity

SATCOM & Defense: Test
environments demanding
industrial-grade reliability

5G/6G Development:
Measurement and
characterization setups with
multiple USB devices

Professional Audio/Video:
Recording equipment requiring
noise-free operation
