

USB-controlled Signal Generators up to 40 GHz

TECHNICAL SPECIFICATIONS

- Frequency range up to 40 GHz
- USB-controlled – Easy integration into automated test systems
- **Optional LMS version with advanced functions**
pulse modulation for radar and communication applications as well as frequency sweep trigger for dynamic signal testing
- Output power up to +20 dBm for high-power applications
- Low phase noise and high frequency stability
- Fast switching speed for demanding test environments

APPLICATIONS

Telecommunications

Radar systems

Laboratory testing

Research applications

Automated RF test systems
