

# Circulators up to 170 GHz

## TECHNICAL SPECIFICATIONS

- Frequency range 1.12 GHz to 170 GHz
- Low insertion loss and high isolation across all bands
- High-power and low-power variants available
- Fullband circulators with consistent performance
- Custom solutions available upon request

## APPLICATIONS

High-power radar systems and FMCW radar

SATCOM and satellite communication

Defense and aerospace systems

5G/6G infrastructure and mmWave networks

Test and measurement for HPA and LNA characterization

Scientific research in the sub-THz range
