

# Waveguide Power Dividers up to 110 GHz

## TECHNICAL SPECIFICATIONS

- Wide frequency range – Available from WR340 to WR10
- Multiple configurations – 2-way to 16-way versions for different power division requirements
- Various power levels – Customizable to specific requirements
- Low insertion loss and high isolation – Ensure superior signal integrity

## APPLICATIONS

5G communications

Test and measurement  
equipment

Radar systems

Satellite and space  
communications
