

Waveguide Rotary Joints up to 40 GHz

TECHNICAL SPECIFICATIONS

- Frequency range up to 40 GHz (WR284 – WR28) – covering a broad frequency spectrum
- Single-channel rotary joints – ideal for standard applications
- Dual-channel rotary joints – supporting multiple signal paths for complex systems
- Low insertion loss and stable signal transmission
- Robust construction for long-term operation
- Custom solutions available upon request

APPLICATIONS

Radar systems

Satellite communications

Test and measurement
equipment

Antenna systems
