

*Your supplier for RF/microwave components*

**Portable USB Signal Generators up to 40 GHz**  
*for L-Band, S-Band, C-Band, X-Band, KU-and K-Band*

- Wireless Testing*
- USB powered and controlled*
- Selectable internal/external 10 MHz reference*
- Robust aluminum construction*
- Programmable frequency stepping*
- Portable LO Source*
- Phase-continuous frequency sweep (LFM)*
- Operate multiple devices directly from a PC or self-powered USB hub*
- Includes easy to install and operate GUI*
- High-speed internal and external pulse modulation*
- High-speed switching up to 20 GHz*
- Easily programmable for ATE applications*
- Customization available for unique requirements*
